

YS-700/2(DZYS-700/2) Compress (Vacuum) Packaging Machine

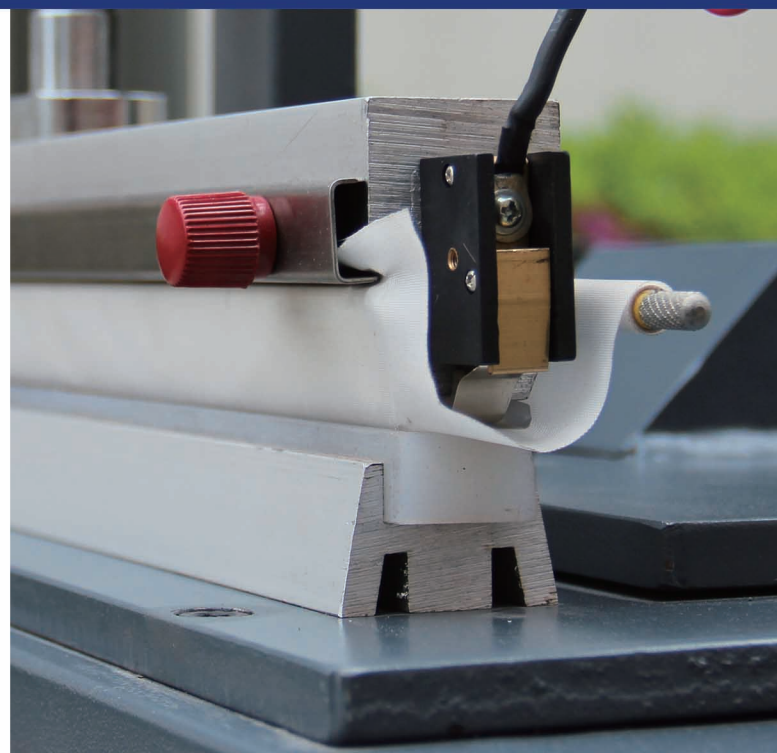

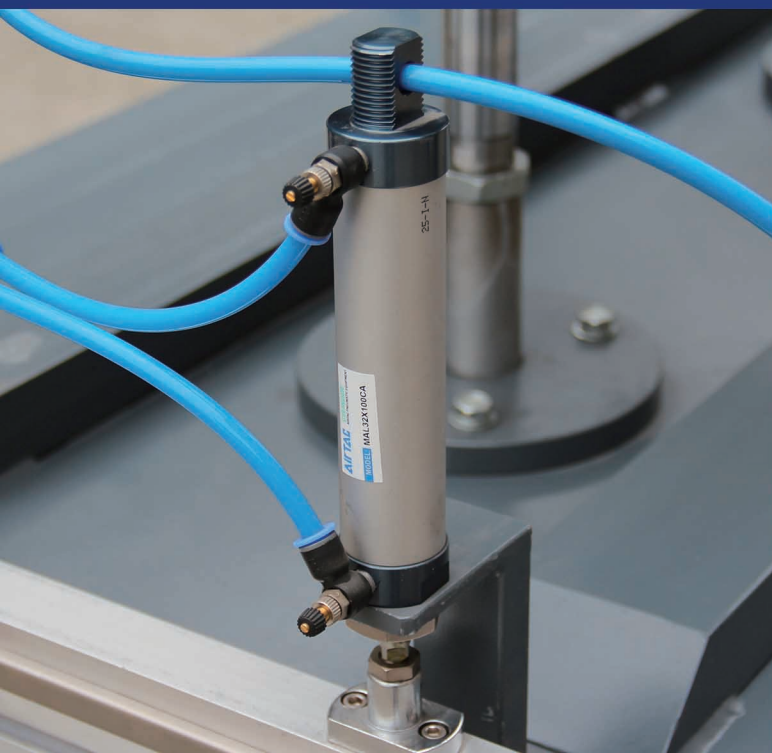

YS-700/2 compress packaging machine is designed with double stations which can work at the same for high efficiency. When extra vacuum is needed, here's a DZYS-700/2 for option). It is mainly used for compressing and packing fluffy items such as down quilt, space quilt, pillow, cushion, clothing and sponge. It can reduce the packaging space and volume without changing the shape of the items. It is flat and beautiful, moisture-proof and dust-proof, and can reduce the storage and transportation cost.

Feature

1. It adopts double-cylinder compression, with the characteristics of high pressure and high compression rate.
2. Double-station operation, both sides can operate at the same time to improve work efficiency.
3. The machine adopts pneumatic compression, will not cause pollution to the whole working environment.
4. Special specifications can be customized, and vacuum function or single-station operation can be customized according to customer requirements

SPECIFICATIONS

Machine Model	YS-700/2
Voltage (V/HZ)	220/50
Power (Kw)	1.5
Packaging Height (mm)	≤350 (customized)
Packing Speed (times/min)	2
Sealing Length (mm)	700 (customized)
Matching Air Pressure (Mpa)	0.6
Dimensions(mm)	1480×950×1880
Weight (kg)	480
